FOR **WINTER AND SPRING**

H.R.H. THE PRINCE OF WALES.

237 & 238 HIGH HOLBORN LONDON

BEAUTIFUL FLOWERS AT CHRISTMAS AND EASTER.

The subjoined Drawing is a Key to the Coloured Illustration on the Covers of this Catalogue; and we can confidently recommend the eight forms of White and Coloured Flowers there displayed, as being most valuable for Winter and Early Spring use. They are all of simple cultivation, and equally adapted for Church or House Decoration.

KEY TO COLOURED PLATE ON COVER.

Scarlet Van Thol Tulips	...	5 0	0 9

Key CARTERS' BERMUDA EASTER LILY.—No. 1. Bulb of recent introduction has secured such universal admiration and widespread popularity as the beautiful Easter Lily of Bermuda. The chaste snow-white flowers supply a long-felt want for purposes of Church Decoration. In establishments where a quantity of bloom is required for cutting, or grown in pots for general furnishing and decoration, the Easter Lily is indispensable. The flowers are produced in clusters, and are exquisitely perfumed. We offer fine sound and well-seasoned Bulbs, specially grown for us in Bermuda by the most celebrated cultivator upon the Island, and the true Easter Lily Bulbs shipped by this cultivator for sale in Europe can only be obtained from us. This Lily may be forced into bloom by Christmas. It is a most robust grower, and will thrive luxuriantly if the Bulbs are planted in 8-inch pots about 4 inches below the surface, the compost consisting of one-half sand, peat, loam, and leaf-mould, and one-half well-decayed farm manure.

"The Easter Lilies have turned out exceedingly well. I cut 131 blooms from 15 Bulbs."
 F. G. LEMON, ESQ., Castle Cary.

"Our Easter Lilies were most lovely, and greatly admired."
 MRS. PURRBT, Leighton Buzzard.

Magnificent Bulbs, 9 to 12 inches in circumference, specially selected for Exhibition	...	21 0	2 6
Fine Bulbs	...	10 6	1 0

We also supply smaller Bulbs (as usually advertised), price 5s. per dozen.

Key NARCISSUS EMPEROR.—Probably the noblest and most striking Daffodil in cultivation, of great size and substance, trumpet clear yellow, perianth delicate primrose; beautiful and very desirable ...
 No. 2. ... Per 100. 17 6 ... Per doz. 1 6

Key NARCISSUS EMPRESS.—Rich golden-yellow trumpet with broad white perianth, a charming companion to the above ...
 No. 3. ... Per 100. 12 6 ... Per doz. 1 6

Key NARCISSUS POETICUS ORNATUS.—White, orange cup with red margin ...
 No. 4. ... Per 100. 7 6 ... Per doz. 1 0

This charming variety is the first to find its way into the London markets about Eastertide, where its beauty commands general admiration.

Key LILY OF THE VALLEY.—An old favourite with all admirers of lovely white bloom. Can be readily forced to suit all seasons throughout the winter. Imported Clumps ... each 1s. 6d. ... 12 0
 No. 5. ... Per 100. 7 6 ... Per doz. 1 0

Key FREESIA REFRACTA ALBA.—A delightful species of Cape flowering plants, with long racemes of exquisitely scented pure white flowers. The odour from a pot containing six Bulbs will perfume an ordinary greenhouse. As cut bloom they are invaluable, lasting fresh several days. They may be forced into bloom by Christmas if planted early ...
 No. 8. ... Per 100. 6 0 ... Per doz. 1 0

NARCISSUS INCOMPARABILIS STELLA.—White, star-shaped, with pale yellow cup ...
 Per 100. 6 0 ... Per doz. 1 0

ARUM LILY (Calla Aethiopica).—The beautiful Lily of the Nile. A most useful decorative plant for forcing ...
 Per doz. 4 6 ... Each. 0 6

SPIRÆA JAPONICA.—The white feathery sweet-scented flowers are freely produced well above the elegant foliage, which is highly ornamental ...

"You have sent me a great many Bulbs for so small a sum. Have you made any mistake? I have not deducted the discount, for in truth I imagine I have got double worth for my money."

To Messrs. JAMES CARTER & CO., Nov. 19th, 1888.

REV. HENRY MASON, Lough Eske.

We were favoured with the following Letter in connection with the Bulbs supplied by us to the London Royal Parks:

H.M. OFFICE OF WORKS, WHITEHALL PLACE, 21st August, 1888.

GENTLEMEN,—In reply to the inquiry contained in your letter to Colonel Wheatley of the 9th inst., I am directed by the First Commissioner of Her Majesty's Works, etc., to acquaint you that the Bulbs supplied by you last year for use in the Royal Parks under the charge of this Department gave every satisfaction.

MESSRS. J. CARTER & CO., etc., etc.

I am, etc., etc.,
(Signed) H. R. POTTER.

CARTERS' BULBS in the LONDON PARKS in 1888, 1889, 1890, and 1891—see pp. 3 & 4.

CARTERS' EXHIBITION HYACINTHS.

CARTERS' PRIZE SINGLE HYACINTH,
"Snowball."

White—a splendid bell of great substance price 1s.
(Included in Collection No. 8.)

CARTERS' PRIZE DOUBLE HYACINTH,
"Laurens Koster."

Double Purple—fine truss price 1s.
(Included in Collections Nos. 10 and 12.)

SCOTLAND.

"The Hyacinths in water-glasses were fine handsome blooms; even a few which sent up two or three stems looked handsome, and were greatly admired. Now those in the balcony are lovely, although only clear of two or three days' snow and frost."

MISS M. B. MARSHALL, Edinburgh.

BUCKS.

"The Hyacinth Bulbs I received were very fine, although only 6d. each. One very fine dark blue had no less than four distinct flowers which were so heavy they had to be propped up."

MR. J. CLARK, Great Missenden.

CARTERS' BULBS in the Victoria Embankment Gardens, 1889, 1890, & 1891—see p. 4.

Carters' Magnificent Hyacinths for Exhibition.

Including Varieties contained in the Prize Groups at the Great International Exhibitions, Amsterdam, Ghent, Royal Botanic Society, etc., etc.

No. 8.—Carters' Selection of the Best 24 Varieties for Exhibition, price 20s., comprising—

Alba maxima, pure white.
Bird of Paradise, rich lemon.
De Candolle, lilac, very fine, well shaped.
Feruck Khan, dark purple, almost black.
Florence Nightingale, fine pure white.
General Pellssier, deep rich crimson.
Gertrude, deep pink, large truss.
Grand Maître, splendid blue, large truss.

King of the Blues, splendid dark blue.
King of the Yellows, fine bright yellow.
La Grandesse, splendid pure white.
Lord Derby, magnificent blue.
Lord Hartington, purplish mauve.
Lord Macaulay, carmine and rose, splendid.
Masterpiece, magnificent, black.
Mont Blanc, purest white.

Noble par Mérite, deep rose, splendid truss.
Pleneman, magnificent pale blue.
Queen of Hyacinths, vermilion, splendid.
Queen of the Netherlands, pure white, splendid.
Snowball, pure white, very chaste.
Solfaterre, orange scarlet.
Sultan's Favourite, beautiful rose, pink striped.
Von Schiller, fine deep red.

No. 9.—Carters' Selection of the Best 12 Varieties for Exhibition, price 10s., comprising—

Duke of Wellington, flesh white, fine large bells.
Grand Lilas, splendid porcelain lilac.
Grand Maître, splendid blue, large truss.
King of the Yellows, bright yellow, grand spike.

King of the Blues, splendid dark blue.
La Grandesse, splendid pure white.
Masterpiece, magnificent, black.
Mont Blanc, purest white.

Noble par Mérite, deep rose, splendid truss.
Queen of Hyacinths, vermilion, splendid.
Sultan's Favourite, beautiful rose, pink striped.
Von Schiller, fine deep red.

No. 10.—Carters' Selection of the Best 24 Varieties for general Cultivation in Pots, price 16s. 6d., comprising—

Alba maxima, pure white.
Argus, rich purple, white eye.
Blocksberg, porcelain.
Czar Peter, light porcelain lilac.
Duchess of Richmond, salmon rose, pink stripe.
Duke of Wellington, flesh white, fine large bells.
Gigantea, delicate rose.
Grand Vainqueur, pure white.

King of the Yellows, bright yellow, grand spike.
Lady Franklin, cream white, large flowers.
La Tour d'Auvergne, pure white, fine truss.
Laurens Koster, fine purple.
Lord Chelmsford, splendid porcelain, grand.
Lord Macaulay, carmine and rose, splendid.
Madame Van der Hoop, pure white.
Noble par Mérite, deep rose, splendid truss.

Norma, fine rose.
Paix de l'Europe, large spike, pure white.
Pleneman, magnificent pale blue.
Prince Albert, intense black purple.
Prince of Orange, deep salmon rose, large, compact.
Robert Steiger, fine crimson.
Roi des Belges, bright scarlet, fine truss.
Solfaterre, orange scarlet.

No. 11.—Carters' Selection of the Best 24 Varieties for general Cultivation in Glasses, price 18s. 6d., comprising—

Alba maxima, pure white.
Anna Bolena, beautiful blue.
Czar Peter, light porcelain lilac.
Elfrida, creamy white, fine.
Fabiola, pale pink, striped, grand truss.
Gertrude, deep pink, large truss.
Gigantea, fine pale rose.
Grand Lilas, splendid porcelain lilac.

Grand Maître, splendid blue, large truss.
Grand Vainqueur, pure white.
King of the Blues, splendid dark blue.
L'Or d'Australle, bright yellow, large truss.
Lord Chelmsford, porcelain, grand truss.
Lord Wellington, pale pink.
Lothair, pale blue, shaded mauve.
Madame Van der Hoop, pure white.

Malden's Blush, rosy pink.
Mimosa, dark purple, fine.
Mont Blanc, purest white.
Robert Steiger, fine crimson.
Sultan's Favourite, beautiful rose, pink striped.
Village Maid, splendid pale pink.
Voltaire, creamy white.
Von Schiller, fine deep red.

No. 12.—Carters' Selection of the Best 12 Varieties for general Cultivation in Pots, price 8s., comprising—

Charles Dickens, splendid porcelain.
Czar Peter, light porcelain lilac.
Elfrida, creamy white, fine.
Gigantea, delicate rose.

Ida, pure bright yellow.
King of the Blues, splendid dark blue.
La Tour d'Auvergne, fine truss, pure white.
Laurens Koster, fine purple.

Lord Macaulay, carmine and rose, splendid.
Mars, splendid deep red, green tips.
Mont Blanc, purest white.
Village Maid, splendid pale pink.

No. 13.—Carters' Selection of the Best 12 Varieties for general Cultivation in Glasses, price 8s. 6d., comprising—

Alba maxima, pure white.
Gertrude, deep pink, large truss.
Grand Lilas, splendid porcelain lilac.
Grand Maître, one of the finest blues.

King of the Blues, splendid dark blue.
La Franchise, bells waxy white, very large.
Lord Chelmsford, splendid porcelain, grand.
Lord Macaulay, carmine and rose, splendid.

Madame Van der Hoop, pure white.
Robert Steiger, fine crimson, large bells.
Village Maid, splendid pale pink.
Von Schiller, fine deep red.

- No. 14.—Carters' Selection of 50 Fine Varieties (distinct), for Pots and Glasses, price 35s.
No. 15.—Carters' Selection of 50 (in 25 Choice Varieties), for Pots and Glasses, price 30s.
No. 16.—Carters' Selection of 100 Fine Varieties (distinct), for Pots and Glasses, price 65s.
No. 17.—Carters' Selection of 100 (in 50 Choice Varieties), for Pots and Glasses, price 50s.

Cheaper Selections of good Flowering Varieties of named Hyacinths, for Pots and Glasses, price 6s. per dozen.

From personal experience we recommend the Hyacinths on this page as being the best Varieties in Cultivation.

"I am greatly pleased with the Bulbs sent me some time ago. They have all done remarkably well"—MR. F. E. CHARLESWORTH, Axminster.

"The Bulbs appear to be exceedingly good, and marvellous value."
MR. E. CAREY, Clapton.

"The Box of Bulbs you sent have proved most successful, all of them standing the winter well."—MR. J. L. MUSPRATT, Rhyl.

"The Bulbs received gave great satisfaction."

SOUTH SHIELDS BURIAL BOARD.

"MRS. WHEELER wishes again to express her satisfaction with Carters Box of Bulbs."—Scarborough.

"I have received the Bulbs to-day in good condition, and they give me great satisfaction."—MR. J. CRAY, Greenhithe.

CARTERS' BULBS in the ROYAL PARKS in 1888, 1889, 1890, and 1891—see pp. 3 & 4.

Carters' Single and Double Hyacinths.

THE CULTIVATION OF THE HYACINTH.

"OUT-DOOR."—Plant from September until December. The crown of the bulb should be four inches below the surface of the ground. Plant in sandy loam, or in any free garden soil.

For Drawing Room, Greenhouse, or Conservatory, begin potting in September for an early bloom, and if a succession is required, at intervals until the end of the year. The best soil is a friable sandy loam with a little leaf mould and rotten dung. Cultivators usually put a little sand under the bulb, which should show its apex just above the level of the soil after being potted. When potting is complete let the pots be placed on a dry level bottom of coal ashes in an open place and covered over to a depth of from six to eight inches above the bulbs, with decayed leaves, sand, or old tanner's bark, leaving it rather higher in the centre than at the sides, so as to throw off heavy rains; or a few boards or a tarpaulin will be useful for the same purpose, as the soil in the pots will absorb as much moisture from the ground as the bulbs require. If placed in such a bed from the beginning of September to the middle of October, the bulbs will have a temperature ranging from 50 to 55 degrees, which, in soil not over-wet, will promote a healthy vegetation. In from eight to ten weeks the pots will be getting crammed with roots, and before that time it is vain to attempt to force them to produce good flower stems. When wanted in full bloom by Christmas and the New Year, those pots full of roots and showing the truss through the incipient leaves, should be selected, placed at first in a shady part of a greenhouse, so that the blanched foliage may not be hurt, and in a few days remove to a forcing pit where a mild bottom-heat can be given to the plunged pots of from 70 to 75 degrees, and a top-heat of from 60 to 65 degrees. Here the

plants must be gently shaded until the leaves become quite green. The pots, though plunged, should be set upon slates, boards, or anything that will prevent the roots from entering the plunging medium, whether tan, leaves, etc. The extra bottom-heat is a great means of success at this early period. Until moved from the bed very little watering will be needed. Whenever the stem shows the least sign of being too much drawn, so as to leave an excess of room between the individual flowers, gradually lower the temperature in which the plants are placed. When the flower-stem and leaves are all that could be desired, and the flowers are approaching the opening, raise the pots out of the plunging medium, and even keep cooler by more air; now the bulbs will require a free supply of water. The bulbs may also be grown in any sitting or dining room in the same way, requiring only that a damp atmosphere should be kept about them; and light is not wanted until they are progressing freely. The bulbs, when potted, will do well in the bottom of a cupboard if set in damp moss or anything of that kind, and a small portion of the same sprinkled over them. In glasses, the water should not be allowed to touch the bulb, though very close to it, and rain or soft water should be used. When lodged in the glasses, the bulbs should be put in some cool place where light is excluded—say a cupboard—there to remain five or six weeks, and when the roots are well developed and the swelling bud and spike starting freely, they may be gradually inured to the full light. The water should not be changed, but filled up occasionally, and a small lump of charcoal kept at the bottom. From the time the flower begins to show, the more light and air are given the better.

Those marked "Ex." are specially adapted for Exhibition.

"Carters' Hyacinths amply repay any trouble of culture. I have for some years grown them in moss, and they have been greatly admired."

MR. R. W. ROAKE, Adlestree.

"The bedding Hyacinths I had last year from Messrs. Carter flowered splendidly, and were much admired."

MRS. G. K. MAHON, Loughrea.

"The Hyacinths from Carters' last November proved a great success. Several have had over 50 spikes on one stem."

MR. E. S. MOORE, Wembley.

"The Hyacinth and Tulip Bulbs from J. Carter & Co. flowered splendidly. I do not suppose there was ever such a show in Callander before."

J. LOXDALE, ESQ., Callander.

We can supply all other Varieties of Hyacinths not included in this List.

CARTERS' BULBS in HYDE PARK in 1888, 1889, 1890, and 1891—see page 3.

Miniature Hyacinths for Children.

This section of Hyacinths is extremely interesting. The mode of culture is precisely the same as for the larger kinds, and as the Miniature Hyacinths are neat and easy of removal, they are admirably adapted for the junior members of a family, who, by care and attention, may produce a miniature *facsimile* of their parents' larger collection. We can supply small glasses or pots for their special culture (see page 37), or they may be grown in a china bowl or glass dish.

The above Hyacinths flower in the order in which they appear here.

HYACINTHS FOR BEDDING.

SEE ALSO "LONDON PARKS" SELECTIONS—page 2.

Hyacinths in Distinct Colours, flowering simultaneously.

Hyacinths for bedding purposes are required distinct and bright in colour to admit of effective arrangement. The under-mentioned are perfectly constant in their respective shades, flowering simultaneously, and producing splendid spikes of bloom, second only to the named varieties.

Strikingly beautiful effects have been produced by an arrangement of the following (planted for contrast in opposite colours), notably in one of the Royal Gardens, where the display won universal admiration.

<table border="0" style="width: 100%;"> <tr> <td style="width: 20%;"></td> <td style="width: 10%; text-align: center;">Per 100—s.</td> <td style="width: 10%;"></td> <td style="width: 10%; text-align: center;">d.</td> <td style="width: 10%; text-align: center;">Per doz.—s.</td> <td style="width: 10%;"></td> <td style="width: 10%; text-align: center;">d.</td> </tr> <tr> <td>CARTERS' BRIGHT CRIMSON</td> <td style="text-align: center;">20</td> <td style="text-align: center;">0</td> <td></td> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td></td> </tr> <tr> <td>CARTERS' DEEP ROSE</td> <td style="text-align: center;">20</td> <td style="text-align: center;">0</td> <td></td> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td></td> </tr> <tr> <td>CARTERS' LIGHT ROSE</td> <td style="text-align: center;">20</td> <td style="text-align: center;">0</td> <td></td> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td></td> </tr> <tr> <td>CARTERS' RICH PURPLE</td> <td style="text-align: center;">20</td> <td style="text-align: center;">0</td> <td></td> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td></td> </tr> <tr> <td>CARTERS' DARK BLUE</td> <td style="text-align: center;">20</td> <td style="text-align: center;">0</td> <td></td> <td style="text-align: center;">3</td> <td style="text-align: center;">0</td> <td></td> </tr> </table>		Per 100—s.		d. THE DOUBLE TUBEROSE.

CARTERS', 237 & 238, HIGH HOLBORN, LONDON

Extra Early Double Sweet-scented TUBEROSES.

See Coloured Illustration, page 1 of Cover.

We have again secured our stock from some large cultivators of the above exquisitely fragrant and favourite Bulb for bouquets, button-holes, etc. The ROOTS are UNUSUALLY FINE, and the price is so low as to place this charming flower within the reach of all.

The Sweet-scented Double Tuberozes are invaluable for bouquets, ladies' dress, or as coat flowers. The perfume is exquisite, and the general appearance of the pure white double flower is most charming. They should be cultivated largely, in the manner indicated below.

"Carters' Tuberozes were very good. I have one with five spikes of flowers from a single bulb. This with us here is a rarity."

Odessa.

EDWIN W. HASLER.

Extra large Bulbs, per 100, 21s.; per doz., 3s.

THE CULTIVATION OF THE TUBEROSE.

From "Carters' Practical Gardener."—The double-flowered Tuberoze may be had in succession by potting the tubers, and plunging them in a cold frame, covering them four inches deep with cocoanut-fibre refuse, but they start a little more quickly and with greater certainty in a gentle bottom-heat. Loam and well-decayed manure, in about equal parts, with a little coarse river-sand, is the most suitable compost in which to grow them. The pots may be taken out of the frame as soon as the flower-stems appear above the leaves, removed to the greenhouse, and taken into the forcing-pit as required.

TULIPS.

Cultivation of the Tulp.—For early forcing, pot some Single and Double Duc van Thols in September, place them on coal-ashes, and cover them as recommended for Hyacinths, etc., and early in November remove them into heat; the principal bulk need not be potted until October, and a last batch of Tournesol, or Rex Rubrorum, in November. The routine of pot culture for succession, as regards the gradations of temperature, is practically the same as for Hyacinths; of the early kinds, five bulbs may be placed in a 5-inch pot; and of the later kinds and larger bulbs, one of the best may be put into a 3 or 4 inch pot, and three of the smaller in a 5-inch pot; when several are placed in one pot, the Bulbs should be set going in loose soil a month previously, in order to choose those that are equal in growth.

For open-air culture, many of the showiest kinds are priced at comparatively low figures, so that a charming bloom may be secured for an inconsiderable outlay. Care should be taken that the beds are well drained, as moisture at the roots is very injurious; the soil should be turned about, adding a little fresh compost if necessary; the Bulbs may be planted at a distance of 5 or 6 inches apart, and at a depth of about 3 or 4 inches, surrounding them with silver sand, to prevent injury from excessive moisture.

Carters' Variegated-leaved Tulips. (See Illustration.)

These very pretty forms of Tulips are but little known. The outer edges of the leaves are evenly banded with broad lines of silver or gold, as shown above, presenting a Yucca-like appearance and producing a charming effect for conservatory or bedding, both before and after flowering. A most unique and effective group, the variegation of the foliage equalling the finest Agaves and Yuccas.

"The Collection Parrot Tulips I had from you last autumn have flowered grand, they have been admired by all who have seen them."—J. SANDERSON, ESQ., Chislehurst.

The Parrot or Fringed Tulip—New and Elegant Varieties.

Visitors to the Flower Shows held in the Temple Gardens will remember the immense group staged of the quaintly formed, brilliantly marked Fringed-petalled Tulips. They commanded universal admiration, and the selection we offer comprises the most distinct forms and colours. The Parrot Tulip is equally valuable for pot culture and outdoor planting. The Illustration well portrays this curious genus.

CARTERS' CHEAP CROCUS.

Cultivation of the Crocus.—As soon as the Bulbs are obtained they should be planted, and perhaps the readiest way is to open a drill with a hoe, or light spade, to the required depth, and then pop in the Bulbs regularly; cover over, and all is done that is necessary for the best of Crocuses. In clumps along the mixed border they are also very effective. For in-door culture they should be potted at intervals; first, as soon as the Bulbs are ready, again early in October, and, if a long succession is required, later still; and as they are only effective in masses, a 4-inch pot should contain five large Bulbs, or seven smaller ones, and so on with other sized pots in proportion. In forcing, the extra heat must be applied very gradually, and scarcely ever above 55° to 60°; and before being submitted to any rise, the pots must not only be full of roots, but the flower-buds appearing; and, as soon as tending to the opening, the pots must be removed to a cool greenhouse or window.

Price: 10s. 6d. per 100. 1s. 6d. per doz.

Carters' "Scilly Isles" Narciss.

Flowers creamy white or bright orange, borne in trusses of ten to twelve handsome blooms on one stem; the White variety is distinct from Paper-White, and although not quite so pure in colour it makes a very fitting companion to this popular variety. One great recommendation is the succession of flowers these produce, which makes them invaluable as market plants. In the Scilly Isles last year the cutting commenced the first week in January and continued up to the end of March. Price 1s. 6d. per dozen; 10s. 6d. per 100.

Carters' Polyanthus Narcissus.

Cultivation of the Narcissus.—Out of doors any common soil suits them. In pots, the compost recommended for Hyacinths is also well adapted for these. As a general rule the larger these Bulbs are, provided they are well ripened, the better and stronger will they bloom; the larger roots, such as *Her Majesty*, *Bathurst*, *Grand Monarque*, etc., require a 6-inch pot to grow a large Bulb well; when three middle-sized Bulbs are used, give an 8 or 9 inch pot. The Bulb should be covered three parts at least with soil; if the atmosphere of the house is at all dry, a little damp moss over the Bulb and the surface of the pot will be an advantage; a little weak manure water when growing will be found highly advantageous.

Carters' Garden Narcissus and Daffodils.

These early Spring-blooming and pretty out-door flowers are almost too well known to need comment; the commonest and best-known variety is the Daffodil. All the sorts look well whether planted singly, in groups, or in large or small beds, and require scarcely any attention as to cultivation; the early period of their blooming renders them desirable.

GLOXINIAS, CALCEOLARIAS, PETUNIAS, ETC.

UNSOLICITED TESTIMONY of the SUPERIOR EXCELLENCE

OF

Carters' Hyacinths, Tulips, Crocus, Plants, etc.

"The Tulips and Hyacinths I had from you last year made a splendid show. Some of the Tulips had foliage leaves six inches wide and enormous flowers. Some put out axillary flowers (a thing I have not seen in Tulips before), which made the show of blossoms continue considerably longer."

Rcv. A. GARLICK, Donnington, Spalding.

"The 75 Dark Blue Hyacinths from Carters' had very fine flowering spikes."—Mr. W. WATERS, Head Gardener to Sir J. W. RAMSDEN, Bart.

"The Bedding Hyacinths from Carters' have been really beautiful."

F. PFEIL, Esq.

"Our Crocus from Carters' are the loveliest I have ever seen."

Mr. J. B. WILES.

"Carters' Hyacinths and Tulips were lovely; every one that visited us greatly admired them."—Mr. F. SCARLETT.

"The Hyacinths from Carters' Guinea Box of Bulbs are now in beautiful bloom, and are remarkably fine."—H. TASKER, Esq.

"The Bulbs from Carters' are doing well, and there are no failures."

Colonel MACKAY HERIOT.

"The 48 Rose Trees turned out very satisfactory; there was an abundance of very fine bloom on all."—Mr. A. DOBSON.

"The Hyacinths from Carters' have turned out particularly good—the White Romans were really splendid."—Mrs. SLACK.

"The Hyacinths supplied by Messrs. Carter were simply superb; the great trusses of bloom were the admiration of all who saw them."

Mrs. LOUIS.

"Carters' Hyacinths are simply superb, and the admiration of all my friends."—W. A. WATHER, Esq., J.P.

"The Bulbs all came beautifully—the 1000 Bulbs is the cheapest parcel Lady King ever heard of, and such fine roots."

"I have a most magnificent bed of Carters' Empress Anemones—the colours are lovely."—Miss MILLER.

"The Maréchal Niel Rose has borne over 1500 blooms, and has gained me a prize each time I have exhibited."—T. J. WHITE, Esq.

"I am especially pleased with the Gladiolus, being finer than I expected."—MR. A. JACKSON, Macclesfield.

"The Bulbs you sent this year have been very fine."

Mr. P. THORPE, Gardener to Miss KING, St. Leonards.

"The Roman Hyacinths from Carters' have been beautiful."

Mrs. BARKER.

"I have grown Hyacinths for many years, but have never had such a magnificent show before; in every respect my display is the finest in the neighbourhood."—Mrs. JONES, Broadstairs.

"The 50 Roses and 400 Strawberries from Carters' are now showing fine bloom."—A. MCNEILL, Esq.

"Mrs. Fenton wishes to inform Messrs. Carter that the Hyacinths were excellent."

"The Crocus Bulbs from Carters' are now in bloom, and are simply a mass of flower."—Mrs. PAUL.

"I have always found Carters' Tulips most beautiful."

Miss GREGOR.

"Carters' Tulips are, as usual, most satisfactory."

G. T. HENDERSON, Esq.

"Carters' White Roman Hyacinths have done exceedingly well."

Mr. G. LINFOOT, Head Gardener to Sir E. RIPLEY, Bart.

"The 1000 Bulbs from Carters' bloomed splendidly; they were very fine."—H. MARNHAM, Esq.

"Send me two more Apricots; some I had 20 years ago have been a great success."—C. WRIGHT, Esq.

"Last year I had Bulbs direct from Holland, which were not over good, so that I am now growing Carters' with every confidence."

Lieut.-General HAWLEY, C.B.

"The Bulbs from Carters' are very satisfactory; their new plan of coloured tickets is also highly approved."—Mrs. LAFONT.

Unsolicited Testimony of the Superiority of Carters' Bulbs and Plants. (See above.)

Beauty and Fashion in Daffodils

Chinese Fairy Lilies. The Chinese Emblem of Good Luck.

We were the original introducers of this Lily into England, and our importations are again coming direct to us from the mountainous districts of Northern China.

Price 1s. each; 10s. 6d. per dozen.

If cultivated in water (as by the Chinese) the Bulbs should be placed into fancy Bowls (those offered below are very suitable), filled up with about an inch of clean gravel, upon which the Bulbs are placed, say 3 to 6 Bulbs in a bowl, according to size. Water liberally, but never let the water stand high up in the bowl, but give only enough to keep the roots thoroughly wet. They may then be placed in a cupboard, or similar place with an even temperature, to encourage the growth of the roots, and introduced to the strong light as the plant develops.

WE HAVE AGAIN IMPORTED A LIMITED QUANTITY OF

SPECIALLY DECORATED JAPANESE BOWLS,

AS ILLUSTRATED ABOVE, AND USED IN JAPAN FOR THE CULTIVATION OF THE CHINESE SACRED LILY,

Which we can supply at the following prices so long as unsold:

1 Bowl for 1 Bulb, price 1/- 1 Bowl for 2 Bulbs, price 2/- 1 Bowl for 3 Bulbs, price 2/6 1 Bowl for 4 Bulbs, price 3/6 1 Bowl for 6 Bulbs, price 4/6.

"As a lover of Daffodils I have read with much interest in *The Garden of March* your notes on the only form cultivated in China, the Water Fairy Flower, and as you express a wish for some further information as to these I take the liberty of addressing you on the subject, more especially as I think I can meet your desire for a larger importation of the Chinese Narcissus.

"Before leaving England, three years ago, I grew a small collection, and was therefore much interested to find on coming out here that it was still possible to grow Daffodils, though on a limited scale and under different conditions.

"All that you write as to the Chinese history and culture of the plant is correct (including the story of the brothers), as far as I have been able to ascertain. Chinese inform me here, however, that they do not, as a rule, call the whole species 'Grand Emperor,' but they would refer to one particular spike or bloom in these terms, just as we should say, 'that is a champion Strawberry,' indicating one special goodness.

"In addition to the fact that the Chinese for the most part grow the bulbs in water, the leading distinction between their culture and ours appears to be that in China they are universally grown as annuals, the bulbs always being thrown away after blooming, and new ones bought for the next year. Various attempts have been made at different times to grow them a second year, but always, as far as I know, without success. In South China the chief and I think only farm is in the interior, not many miles from Foochow, at a place called Po Tin, and this, I believe, is the scene of the legend to which you refer. The property is still in the hands of the family mentioned in the legend, and the Chinese declare that the bulbs will not grow anywhere else, but this is probably a fiction, and one of a thoroughly Chinese kind.

"As to the culture on the farm, I have been able to obtain no information, but considering the enormous quantity grown in China and around, there must be some rapid mode of propagation, remembering that no bulb is grown a second year after being sent out.

"From the freedom with which the best bulbs bloom, and the number of flowering centres on each bulb, I am inclined to think that the blooming must be retarded for two or three years, so as to throw the whole strength of the bulb into the flower the year it is sent out.

"I had great success with Carters' Chinese Lilies; the 2 bulbs had 13 heads of bloom."

MRS. BROWNE, Kingstown.

"The Chinese Lilies are truly wonderful for the rapidity with which they grow and flower."

REV. H. C. FITCH, Harleston.

"The Chinese Sacred Lilies have blossomed beautifully, and have been greatly admired."

MRS. DODGSON, Middlesex.

"The Chinese Sacred Lilies have flowered abundantly, and have given Miss Giffard great pleasure."—Monmouth.

"The Chinese Lily had 25 double sweet-scented blossoms, and was greatly admired."

MRS. HOLLOWAY, Heckfield.

"The Chinese Sacred Lily is a splendid sight, and much admired."—E. JONES, Esq., Lincs.

"Mrs. Harris is much pleased with the Chinese Sacred Lilies—they have splendid trusses of flower."

Hants.

"Major Murray takes this opportunity of expressing to Messrs. Carter his great satisfaction with their Chinese Sacred Lilies."—Ireland.

"The Chinese Sacred Lily is now in full bloom, and is greatly admired."—Mrs. LUXTON, Devon.

"The most curious feature of the Chinese culture, however, is one to which you do not refer, and of which you may possibly not be aware. Their plan is as follows: they select the strongest bulbs having three or four flowering 'breaks,' and cut away the whole of the outer coatings of the bulb right down to the base, leaving the centres containing the embryo flower-stalks surrounded only by a thin coating. If large specimens are required, two or three bulbs after being so treated are fitted together with cotton wool wrapped round the upper side of the base, and worked together into a circular form; the points of the incipient flower-stalks now curl inwards, rather like the claws of a crab, and the plants are placed in shallow wooden trays in about an inch of water and put into the sun.

"The effect of cutting away the outer coatings of the bulbs is to stimulate rapid growth of the flower-stalks or rather very rapid development of the flowers, which are borne on stalks varying from 2 to 6 inches, and as the growth is rapid, all the flowers come out at once. Just before this time the plants can be removed into any suitable bowl or china ornament, and a pretty and attractive room decoration is obtained. I do not think such a frequent change of water as you mention is necessary; the bulbs treated as above bloom in about twenty days after being put into the water, and it may be changed two or three times. In addition to this mode of growing, thousands are grown in shallow pots half filled with water, the bulbs not being cut.

"They do exceedingly well, moreover, massed in borders in the garden, and I had a fine display last January grown in this way.

"There are only two kinds that I have yet come across—the single *Tazetta* and double-flowered (much resembling the double Roman), and they are grown and sent out indiscriminately. With none of the home kinds to compare with, I should not like to hazard an opinion as to which of the various kinds the single form most resembles."

FROM THE GARDEN, August 3rd, 1889.

"The Chinese Lilies are quite a success; the 2 bulbs have produced 12 beautiful trusses of bloom deliciously fragrant."—MRS. STUART, Kingsbridge.

"The Chinese Lily is in splendid bloom; it has 10 flower-stalks and 42 flowers."—MISS WHITE, Ballymore.

"The Chinese Sacred Lilies have flowered most luxuriantly, and have quite come up to the description in the Catalogue."—MRS. OLIVER, Scotland.

"Mrs. Reynard was very much pleased with the Chinese Sacred Lilies. They have been greatly admired by her friends."—York.

"I am delighted with the Chinese Sacred Lilies; they were one mass of blooms."—Mrs. WILKS, Kent.

Carters' "Empress" Poppy Anemones.

The flowers are of immense size (measuring four inches in diameter) and great substance, invaluable for cutting and decorative purposes generally; and the very moderate price at which they are offered admits of their being extensively used for the decoration of the shrubbery border, where a constant and brilliant display can be produced. The following opinions will be read with interest:

“ ‘Empress’ Anemones.—We have received from Messrs. James Carter & Co. a bouquet of what they term their ‘Giant Empress Anemone.’ They are truly gigantic forms and brilliant varieties of *Anemone coronaria*, and are strikingly beautiful. Several of the flowers are 4 inches in diameter, borne on stalks nearly a foot long and almost as thick as our penholder. The colours are varied and rich, ranging from white through the different shades of lavender to deep purple, and from pale red to glowing scarlet and velvety crimson. They are the finest Single Anemones we have ever seen, and such flowers as these before us would be an acquisition even to the garden of an Empress.”—*Journal of Horticulture*.

“It gives me great pleasure to speak of the value of Carters’ ‘Cockade’ Ranunculus and ‘Empress’ Poppy Anemone—they are really splendid.”
J. ALBRIGHTON, Esq., Tamworth.

“Carters’ ‘Empress’ Poppy Anemones were beautiful last year.”—MRS. FRANCIS, March.
“Carters’ ‘Empress’ Anemones have been lovely.”—MISS HASSALL, Gravesend.

Price, 50s. per 1000; 5s. 6d. per 100; 1s. per doz.

Carters’ Choice Anemones, in Variety.

Cultivation of the Anemone.—Soil: For pot culture, use a compost of good pasture loam, well-rotted cowdung, and sea or drift sand, which should be well incorporated, and examined for the extirpation of wire worm or other obnoxious grubs. For border culture, any good garden soil will suffice, provided it be well drained and moderately light; for pots we prefer that the pots should be half filled with the above rich compost, then a layer of pure sandy loam, on which to place the tubers, and cover two inches deep with the same.
Time of Planting.—For a good succession it is advisable to plant a few in September, the principal bulk in October, and a third lot early in March, which will insure a succession o bloom up to the middle of June. If planted in November, the roots are liable to be injured by frost before they have commenced their growth.
Culture in Pots.—Use the compost before alluded to, place the pots in a cool pit, and sparingly water until growth commences; in the Spring they may be removed to the greenhouse or window, but will not bear too high a temperature. They are subject to mildew; a good preventive is to mix *sea sand* with the compost, or, if that be not procurable, a little salt; ammoniacal liquor, very much diluted, is a good application after infection has taken place.

Carters' "Cockade" Ranunculus.

A splendid variety of colours and shades, immense double flowers, fitting in all respects to be cultivated by the side of the "Empress" Anemone, and equally superior with that variety to any other class of Ranunculus. The flowers are as double as the most perfect Rose, of immense size, and combine every possible shade of colour peculiar to this interesting and easily-cultivated flower. It is impossible to over-estimate their value to all lovers of the Ranunculus family.

Mr. E. MASON, Birmingham, writes: "Carters' 'Cockade' Ranunculus have been simply splendid, and the admiration of all my friends."

MRS. SPENCER ADDISON, Chelmsford, writes: "Carters' 'Cockade' Ranunculus were most lovely, and greatly admired."

Mr. J. CARTER, Bridlington, writes: "Carters' 'Cockade' Ranunculus turned out excellent, both in size and colour. I never saw a prettier snow."

MISS GIFFARD, Monmouth, writes: "The bed of Carters' 'Cockade' Ranunculus was such a blaze of colour as had never before been seen; my friends were perfectly amazed at their brilliancy and beauty."

MRS. SHEIL, Paignton, writes: "Our 'Cockade' Ranunculus from Carters were most beautiful, and admired by every one."

Price, per 1000, 45s.; per 100, 5s.; per doz., 1s.

Carters' Choice Ranunculus—continued.

Cultivation of the Ranunculus.—The best soil for the foer sorts is a retetive loam from the surface of a good old pasture, with the additoo of some well-rotted cowdung, peat, leaf-mould, and silver sand, all to be well iocorporated before using. It is desirable that the rich soil be placed a few inches below the tubers, and these to be covered with loam and silver sand. Perhaps the best time for planting is the month of February, as they are somewhat tender, and if planted too early might start from the ground before the danger of severe frost is over, when they would require a great amount of extra care in protection, or there might be a risk of losing the bloom. The Raunculus requires a firm soil, and it is desirable to work on the beds some time before plantiug, in order that the roots may be placed firmly.

CARTERS' CHOICE LILIES.

Cultivation: Garden Culture.—Select a bed and thoroughly prepare it by filling with about three feet of free, rich, loamy soil, with plenty of sand added, if it does not exist in the loam. Lilies are gross feeders, and always repay the attention if placed in light, deep, and rich soil. They should be planted about six inches deep.

Pot Culture.—Do not use pots less than six inches in diameter, and let them be well drained at the bottom with broken pieces of tile and ashes; half fill the pot with a compost of equal parts of rich garden soil, fibry loam, peat or leaf-mould, and silver sand; then insert the bulbs, carefully surrounding the base with silver sand, and fill the pot until within an inch of the rim; place the pots in a cold frame, pit, or greenhouse during the winter months, and do not water until the bulbs show signs of growth above ground; when growth is perceptible, water freely; and continue as appearances suggest the necessity. Those required for early blooming should be kept under glass, whilst those for later blooming may be left out of doors, being, however, carefully protected from frost. When in bloom, put them in a cool dry place, with a free current of air. The month of October is perhaps the best of all for planting. Re-pot as soon as the stems die down, taking care to give an entire change of soil.

The Golden-Rayed Lily of Japan. LILIUM AURATUM.

A Beautiful Hardy Lily that should be in Every Garden,

ANNUALLY IMPORTED PER FIRST STEAMERS BY

JAMES CARTER & Co.,

DIRECT FROM THE

JAPANESE BULB FARMS.

A PLANT OF
LILIUM AURATUM,
THE
GOLDEN-RAYED LILY OF JAPAN.

Carters' 25s. Case of Liliium auratum, containing 50 handsome Bulbs, sent Packing and Carriage Free on receipt of P.O. or Cheque for 23s. 9d.

Carters' Two-Guinea Case of Liliium auratum, containing 100 splendid Bulbs, sent Packing and Carriage Free on receipt of P.O. or Cheque for 40s.

Carters' 25s. Case of 50 Assorted Japanese Lilies, comprising LILIUM AURATUM, LANCIFOLIUM ALBUM, LANCIFOLIUM RUBRUM, TIGRINUM SPLENDENS, TIGRINUM DOUBLE, THUNBERGIANUM, and others, sent Packing and Carriage Free on receipt of P.O. or Cheque for 23s. 9d.

DR. E. MARSH-STILES, Hednesford, writes:—"I have had a splendid show of Liliiums from the Gulcea Box. I have gained an extra First-Class Prize at our local Show for a collection of eight in pots, there being no less than forty expanded blooms at the time. I may safely say I have never derived so much pleasure from such a display in my life."

A. T. BAYLEV, Esq., Stoborough Grange, Hants, writes:—"The Lilies are now in bloom and have been a great success; they have flowered profusely, the 12 bulbs having produced 90 spikes of bloom, the fragrance being delicious."

MISS CAMPBELL, Wales, writes:—"The Liliium Auratum from Messrs. Carter produced the remarkable number of 73 blooms on one stem, and they averaged 6½ to 8½ inches across; the spike was 21 inches high and 41 inches in circumference. The plant was an object of interest in the neighbourhood."

COL. GRANT, Kent, writes:—"The Case of Lilies opened up very successful."

DR. LAMBE, Gloucester, writes:—"The Japanese Lilies have been greatly admired; I have seen nothing to equal them in Cheltenham."

LADY MAIDSTONE, Sussex, writes:—"The Case of Lilies was the finest and most beautiful I ever saw; not one failed."

MISS EDEV, Cornwall, writes:—"My Liliiums have been a picture; scores have stopped to admire them."

MRS. PETRE, Norfolk, writes:—"The Case of Lilies was most satisfactory; every bulb flowered; one spike produced 41 blooms."

MESSRS. DOBBS & Co., Ireland, write:—"The two Cases of Lilies are in splendid condition, and the marvellous low price astonishes us."

J. CAMPBELL, Esq., Scotland, writes:—"The Case of Japanese Lilies are now in full bloom, and the admiration of every one."

LADY FROST, Cheshire, writes:—"The Case of Lilies proved very successful."

REV. W. MATTHIAS, Wilts, writes:—"The Japanese Lilies did splendidly. I see one of your correspondents speaks of a single spike having fourteen to sixteen flowers; the majority of ours surpassed this, one spike having no less than thirty perfectly-formed flowers."

MR. J. MORRISON, Wick, Scotland, writes:—"I cannot praise Messrs. Carters' Japanese Lilies too highly some carried eighteen to twenty blooms."

MR. G. MURKIN, Head Gardener to H. M. TAYLOR, Esq., Cambridge, writes:—"Carters' Two Guinea Case of Lilies turned out very good; one plant is over seven feet high, with twenty-one very fine blossoms on it."

"LILIES AND HOW TO GROW THEM."

Carters' Selected Iris.

Cultivation of the Iris.—Iris are readily grown in our gardens, preferring a sandy, deep, and free soil; a mass of the mixed kinds is a sight worth seeing.

English Iris.

It is a matter of urgent necessity that the bulbs be planted as soon as possible, as they are very difficult to preserve when out of the ground. The Collection subjoined comprises the finest and newest varieties in cultivation:

English Iris—Mont Blanc, pure white, exquisite, per 100, 25s.; per doz., 3s. 6d.

Carters' Selections of Named English Varieties.

"Glory of the Snow"—Chionodoxa Lucillæ.

45s. per 1000,
5s. per 100,
9d. per dozen.

"The Glory of the Snow."—An attractive Spring-flowering plant, quite *hardy*, very easy to cultivate, and specially useful for forcing. It is described by the finder as follows: "Near the summit of the mountain (Nymph Dagh, east of Smyrna), at an elevation above the sea level of from 3000 to 4300 feet, a mass was met with in full splendour, forming one of the most sumptuous displays of floral beauty I ever beheld; a blaze of colour, the flowers being very large and numerous, of a brilliant sky-blue, with a white centre."

Good loam with a little leaf-mould and sand suits it. Plunge incocoa-nut fibre to encourage root growth, afterwards place in cool greenhouse or window to bloom.

Cultivated Roots of 'Glory of the Snow', very superior.

	s.	d.
Per 1000	45	0

Freesias.

Cultivation.—**FREESIAS.**—They are useful when grown in pots, placing about eight strong bulbs in a five-inch pot. I make up a compost of equal parts loam and leaf soil with a sprinkling of sand, and this mixture suits them admirably. The bulbs should now be shaken out of the old soil, and the largest selected for flowering. Grow the small ones in rather deep pans, to get them strong enough for another year. As soon as potted, remove them to a cold frame, or place them on a shady shelf in the greenhouse. It may be some time before they show signs of growth, but the soil should be kept fairly moist, and as growth increases, the plants will require more liberal supplies of water. So long as frost does not reach them, they will take no harm, and if desired they may remain in the frame until they come into flower. But if the plants are wanted in bloom at Christmas, they must be placed in the warmest part of the greenhouse at the end of October, and about the middle of December be taken to a house where the temperature is not less than 60° by night and 70° by day. It is a mistake to withhold water as soon as they go out of flower, for they require a liberal supply until the foliage is quite yellow.—J. C. C., in *The Garden*.

Freesia Refracta Alba.

A graceful Cape novelty, exquisitely perfumed—the immense trusses of pure white flowers are strikingly beautiful, and last a long time.
Strong Flowering Bulbs, 6s. per 100; 1s. per dozen.

Freesia Leichlini Major.

A gigantic form of this charming and novel species, producing immense sprays of yellow and white flowers. Strong Flowering Bulbs, 10s. 6d. per 100; 1s. 6d. per dozen.

FREESIAS, Mixed Seedlings, very useful for cutting, 7s. 6d. per 100; 1s. per dozen.

Christmas Roses (Helleborus).

Well-known, hardy, and exceedingly pretty white Winter-flowering plants. Height 1 foot.

	Per doz.	Each.

CARTERS' BULBS at HAMPTON COURT in 1888, 1889, 1890, & 1891—see pp. 2 to 4.

Carters' Miscellaneous Bulbs—continued.

Milla biflora.—(Bulbs not ready until December.)—One of the most beautiful of all bulbous plants. The pure white flowers are about three inches in diameter, the six petals arranged in a star-like or Triteleia form.

"Milla biflora for Cut Flowers.—The flowers are nearly as large as those of a Encharis, and snowy white. They last a very long time in a cut state. This plant grows naturally near the city of Mexico, and the natives gather the flowers in the same way as we do our Primroses, and bring the flowers to market. In autumn they should be taken out of the ground and kept dry, and planted again in the spring. Milla biflora delights in sandy, loamy soil; it should have full sunlight and abundance of water."—*The Garden*.

Price 10s. 6d. per dozen; 1s. each.

Imatophyllum Miniatum.—A fine group of warm greenhouse plants, with stately evergreen Amaryllis-like leaves, producing in early Summer large trusses of brilliant orange-tinted vermilion-scarlet flowers. Each, 3s. 6d.

Lachenalias.—Flowers so gracefully coloured and disposed as to be universally admired.

CARTERS' KENTISH ROSE TREES.

During the Royal Visit to the Royal Agricultural Society's Show at Norwich, JAMES CARTER & CO. had the honour of presenting to H.R.H. THE PRINCESS OF WALES a very handsome Bouquet of Roses from Messrs. Carters' Rose Grounds in Kent.

IMPORTANT NOTICE.—In the execution of orders, the requests of purchasers will be as strictly adhered to as possible; however, when the stock of Standards of any particular Rose is exhausted, a Dwarf plant will be sent instead, and *vice versa*, unless the substitution is specially objected to, in which case it is desirable that a supplementary list may be sent; this will prevent the disappointment of receiving a less number of plants than is required for any given purpose.

Remarks on the Best System of Planting Roses.—When they are to be placed on lawns, or in beds amongst other plants, a hole should be made, about 18 inches deep, and large enough to contain half a wheelbarrowful of compost; two-thirds of this should be strong turfy loam (if it can be procured from an old pasture it is preferable), and one-third well-decomposed animal manure; these should be thoroughly mixed together. Should the ground be dry at the time of planting, or if it is done in Spring, a liberal watering should be given before the soil is all filled in around the plants; and Standards should be securely staked, to prevent the winds from moving them. When beds are to be planted, the ground should be deeply trenched, and afterwards a good dressing of manure should be applied; a small quantity of the compost recommended above may also be added around each plant. As Roses seldom thrive well in soils that have previously grown them for a number of years, it is advisable that when old beds are renewed, the soil should be removed to the depth of 18 inches, and its place supplied with the above mixture.

Roses may be transplanted from October to March; it is not advisable to prune at the time of nor immediately after planting. The first season the plants should all be headed back to two or three buds upon each shoot; this will ensure a vigorous growth.

As a general rule, all strong-growing Roses should be pruned very moderately, but those of weak growth can scarcely be pruned too severely. The flowering season may be greatly prolonged by pruning a portion of the collection at intervals from December to March.

SPECIAL NOTICE.—The County of Kent (in which our Nurseries are situated) is familiarly known as The Garden of England, and the soil and climate are specially adapted for the growth of Roses to the greatest perfection.

OUR STOCK OF ROSES COMPRISES ONLY THOSE VARIETIES INCLUDED IN THE ROSE ELECTIONS AS THE VERY BEST.

CARTERS' POPULAR COLLECTIONS OF ROSES.

(The Selection being left to J. C. & Co.)

24 FINEST STANDARD ROSES in 24 varieties, price 45s. | 12 FINEST STANDARD ROSES in 12 varieties, price 24s.

CARTERS' BULBS in the ROYAL PARKS in 1888, 1889, 1890, and 1891—see pp. 3 and 4.

CARTERS' BLACK CHAMPION CURRANT.

AWARDED A
FIRST CLASS CERTIFICATE
BY THE
ROYAL HORTICULTURAL SOCIETY.

This valuable introduction was pronounced by the Committee of the Royal Horticultural Society, as well as by every member of the profession who saw the specimens we exhibited, to be the finest Black Currant ever seen at South Kensington. Many of the berries are so large as to be taken for medium-sized grapes. The bunches are very long, and the flavour of the fruit particularly luscious and delicate. Another important feature is its robust habit and power of resisting drought. The berries exhibited before the Royal Horticultural Society's Committee were gathered after the excessive and prolonged heat experienced in July, 1881, and when other varieties of Black Currant in the same garden were leafless and the fruit dried up, the Black Champion retained its freshness, and the fruit continued in the greatest perfection.

It is the longest and latest hanging variety in cultivation, good fruit having been gathered the last week in September. Unlike other varieties, it will bear the most severe pruning without prejudice.

"ROYAL HORTICULTURAL SOCIETY, AUGUST 9.—FRUIT COMMITTEE.—A First Class Certificate was granted to fruits of a new seedling Black Currant named Black Champion. The individual fruits were of remarkable size, globular, and very black. The bunches also were unusually large, and, judging by the small branches exhibited, the variety must be an extremely prolific one. Several unhesitatingly affirmed it was the finest Black Currant that has been seen at Kensington."—*The Journal of Horticulture*.

"MESSRS. CARTER AND CO.'S SEED FARMS AT DEDHAM AND ST. OSYTH.—A walk over Messrs. Carter and Co.'s Seed Farms with a party of observant critics furnished material for reports more lengthy than can be attempted in these pages at the present time. Once more we saw the Champion Black Currants that many times have made an initiatory sensation for visitors, for rarely have bushes been seen so loaded with huge bunches of jet black currants as large as cherries crowded on the old wood, and in many instances weighing down the stout branches to the ground."—*Gardeners' Magazine*.

As the annual demand is very great, we advise early orders to prevent disappointment.

Price: Nice Healthy Plants Each. Per doz. 1s. 9s.

Carters' Strawberry Plants.

SPECIALLY PREPARED PLANTS READY IN AUGUST.

If the ground is not in good condition, or should the weather be dry and unfavourable for planting on receipt of the plants, they should be potted and kept in a shady place until they are put into the beds.

"NOBLE"

(Laxton).

NOBLE is a very large and handsome regularly-formed flattish globular shaped Strawberry, very early, and ripening in the open air in Bedfordshire before forced Strawberries are over, and ten days before the fruit from Kent and the South-West of England is in the market. The flavour is rich and vinous, and without the treacly taste common to many large sorts, flesh firm and of a shining crimson colour.

Price of RUNNERS: 1s. 6d. per dozen; 6s. per 100.

ROOTED PLANTS, in small pots, 25s. per 100; 3s. 6d. per dozen.

	s.	d.	s.	d.
Auguste Nicaise, an excellent variety for out-door culture, and also for forcing. Very large, handsome, firm-fleshed, and of good flavour	25	0	4	0
British Queen, a well-known favourite ...	21	0	3	6
Commander (new), a very distinct and finely-flavoured Strawberry; the fruits are of a large size, very rich and vinous in flavour, ripening well at the points; forces well, and can also be recommended for out-door cultivation ...	25	0	4	0
Dr. Hogg, fruit of first-rate size and quality, of oval shape, bright orange scarlet, flesh creamy white, firm, very sugary, melting, exceedingly rich, and of fine perfume. This variety is most conspicuous among prize collections at the different shows...	21	0	3	6
Duc de Malakoff, extremely large fruit, bright red, flesh firm, sugary, of a delicious flavour; a good bearer	21	0	3	6
Elton Pine, a late kind, very useful, good flavour, free grower	21	0	3	6
James Veitch, large, handsome, globular form, crimson and white flesh, great cropper	21	0	3	6
Keen's Seedling, an early and good bearing sort, of bright crimson colour, rosy flesh, juicy, very sugary, and of fine perfume	21	0	3	6
King of the Earlies (new), largely cultivated as a most productive, early, and richly-flavoured sort	25	0	4	0
La Grosse Sucree, the best Strawberry of the "Keen's Seedling" type, and unsurpassed for flavour, size, and fertility as a forcing variety, and in the open is a continuous bearer of large fine-flavoured fruits	25	0	4	0
Latest of All (new), the fruit is very large and finely-flavoured; valuable as a late variety	30	0	5	0
Sir Charles Napier, large fruit, of handsome shape, bright crimson, very prolific	21	0	3	6
President, a great cropper, colour bright crimson, of superior flavour; one of its good qualities is its firmness, and it will travel and keep better than most varieties; for forcing or early crop out of doors it is highly recommended	21	0	3	6

Scarlet Queen (new), fruit large, well formed, and of handsome conical shape; colour bright vermilion scarlet; flesh firm, rich, and juicy; very prolific and early	—	—	40	0
Sir Joseph Paxton, a handsome early variety, of a rich dark glossy crimson colour, smooth surface and regular outline; forces well, and is a very free grower and good constitution; the fruit is solid; travels and keeps well, pleasing flavour, great cropper; strongly recommended...	21	0	3	6
Vicomtesse Hericaut de Thury, early, very fine for forcing, prolific	21	0	3	6
Waterloo, a very distinct and popular late Strawberry; fruit very large, dark-coloured, and of good flavour	25	0	4	0
White Knight (new), fruit very large and handsome, longish, conical in shape; flavour rich and vinous; the fruit externally of a light scarlet colour on the upper and white on the under side, sometimes coming quite white when shaded	—	6	0	25

Carters' Selected Vines.

We offer strong, short-jointed, well-ripened plants.

Canes for planting, each 5s. to 7s. 6d.

Strong Canes, each 10s. 6d.

Extra Strong Canes for fruiting and forcing, in pots, each 12s. 6d. & 15s.

Those marked H are the most suitable for out-door cultivation.

Barbarossa, berries round, large, flesh juicy and sweet; a valuable late sort.

H Black Hambro, berries round, deep rich purple, very juicy.

Black Alicante, berries very large, skin thick and tough, blue-black, flesh greenish, firm, sweet, with a fine aroma.

Buckland Sweetwater, bunches large, berries round, inclining to oval, skin thin, transparent, pale green, becoming a paler amber when ripe, flesh tender, melting, and juicy, sweet and well flavoured.

H Foster's White Seedling, berries full size, roundish oval, sweet and richly flavoured; a very useful Grape, early and prolific, with a hardy and vigorous constitution.

Gros Colmar, bunches very large, berries large and round; a fine late Grape.

Gros Maroc, this variety is now recognised as one of our finest Grapes. The berries are large, of a deep black purple, beginning to colour as early as the Black Hambro, and hanging as late as the Black Alicante.

Golden Queen, a splendid Grape, rich amber, large bunches, well-shouldered berries, richly flavoured.

Lady Downe's Seedling, fine late-keeping Grape, large bunches and berries, flesh firm, sweet, and richly flavoured; a vigorous grower and free bearer.

Madresfield Court Black Muscat, a late Grape, with the most intense Muscat flavour.

Mrs. Pince's Black Muscat, bunches large, long, tapering, well-shouldered, berries oval, as large as those of Muscat of Alexandria, purplish black, with a thin bloom.

Muscat of Alexandria, oval, very large, pale amber; finest-flavoured Grape grown; requires heat.

Royal Muscadine, bunches long, loose, and shouldered, berries large, round, and compact, skin thin and transparent, flesh tender and juicy, sweet, and richly flavoured.

H Sweetwater, a useful white Grape.

YORKS.

"The Vines are really splendid Canes; they meet with my greatest satisfaction and approval."

JOSEPH ROWLEY, Esq.

SCOTLAND.

"I did not expect to see such splendid trees for the money. I had no idea they would be so strong."

J. C. MONTGOMERIE, Esq.

NORFOLK.

"The Fruit Trees from Carters' gave the greatest satisfaction."

MISS ROBERSON.

CARTERS' BULBS in REGENT'S PARK—see page 3.

Carters' Marbled
GLOXINIA
BULBS.

Awarded the Silver Cup at the Great Temple Show of the Royal Horticultural Society, May, 1891.

Awarded the Royal Botanic Society's Silver Medal, June, 1891.

Awarded Silver-Gilt Flora Medal at the Temple Show, May, 1892.

Also Awarded the Royal Botanic Society's Bronze Medal, June, 1892.

Our Stock of Marbled Gloxinias embraces the greatest possible variety of colouring and form, including rich crimson, white, and blue grounds, elegantly mottled, and a great variety of beautiful parti- and self-colours. The flowers are of immense substance, and will be found immeasurably superior to other strains.

In addition to a great variety of beautiful seedlings, we have secured the entire stock of several splendid varieties raised by one of the most successful hybridisers of the day. We believe our stock of this elegant flower to be the most varied and perfect in existence, and where the selection is left to us a charming variety of the newest forms may be depended upon.

Strong Bulbs, choice named Varieties, 2s. 6d., 3s. 6d., and 5s. each; 24s., 36s., and 42s. per doz.

Unnamed Seedlings, very good, many equal to named varieties, 9s., 12s., and 18s. per doz.

Carters' Prize Marble Gloxinia Seed, price 2s. 6d. and 5s. per packet.

Carters' "Crown Jewels"
BEGONIA
BULBS.

We possess one of the finest collections of Single and Double Begonias in the country. It includes the most distinct and beautiful varieties, many of which are the result of crosses made at our own Nurseries, while others have been personally selected, comprising only varieties remarkable for brilliancy of colouring or size and substance of flower.

Single Varieties, choice named sorts, 2s. 6d., 3s. 6d., and 5s. each; 24s., 36s., and 42s. per doz.

Single Varieties, choice Seedlings, to colour, from First-Prize sorts, 6s., 9s., 12s., and 18s. per doz.

Double Varieties, choice named sorts, 3s. 6d., 5s., 7s. 6d., and 10s. 6d. each.

Double Varieties, choice Seedlings, to colour, from First-Prize sorts, 18s., 24s., and 30s. per doz.

Carters' Crown Jewels Begonia Seed,

Single Varieties, 1s. 6d., 2s. 6d., 3s. 6d., and 5s. per pkt.

Carters' Crown Jewels Begonia Seed,

Double Varieties, 2s. 6d., 3s. 6d., and 5s. per pkt.

PRIMULA PLANTS—Carters' Prize Strains—Seedlings.

Price 4s. to 7s. 6d. per dozen, according to size, post free, and so long as Stock lasts.

CINERARIA PLANTS—Carters' Brilliant Prize—Seedlings.

Price 4s. to 7s. 6d. per dozen, according to size, post free, and so long as Stock lasts.

CALCEOLARIA PLANTS—Carters' Victoria Prize—Seedlings.

Price 4s. to 7s. 6d. per dozen, according to size, post free, and so long as Stock lasts.

ACHIMENES.—A splendid collection. Choicest named sorts, per doz. 4s., 6s., 9s., & 12s.

AZALEAS.—Well set with flower buds. These can be supplied in nice plants, well set with flower buds, suitable for forcing, or they may be grown in any ordinary greenhouse, and make fine decorative plants for dinner table and other purposes. Single and double varieties, our selection. Each, 2s. 6d., 3s. 6d., and 5s. Per doz. 30s., 36s., and 42s.

CAMELLIAS.—The finest Continental Varieties, thoroughly well-budded and well-grown plants, suited for general greenhouse decoration. Each 3s. 6d., 5s., & 7s. 6d. Per doz. 36s., 42s., and 60s. **Our Camellias are very fine.**

CARTERS' CHOICE GREENHOUSE PLANTS.—For flowering during the Autumn and Winter months. Price 22s., 24s., 30s., and 42s. per dozen.

GLASS,
IN RICH COLOURS.
Decorated. Very choice.

Each, 2s. ;
per pair, 3s. 6d.

TUBULAR FLOWER HOLDERS.

A NEW SYSTEM OF ARRANGING CUT FLOWERS.

By Royal Letters Patent in England and Abroad.

This simple contrivance will be found to facilitate the Art of Floral Decoration in all its branches.

FURNISHED.

UNFURNISHED.

The Flower Holders are solid disks in the shape of a dome, with flat base, in which are sunk 40 to 50 tubular orifices gradually inclining outwards from the centre. When flowers are to be arranged, the tubes are filled with water, and the disk is placed on an ornamental plate of wide diameter (preferably of glass or terra cotta), which retains any overflow of water, and supports the outer leaves. The sprays of flowers and foliage are inserted in the tubes one by one according to the taste of the arranger—the highest in the centre ; others inclining outwards, and the lowest resting on the margin of the plate.

The numerous separate tubes give to the arrangement a lightness and beauty which cannot be obtained with ordinary vases, in which flowers and leaves must necessarily be crowded together for want of lateral support. Each spray, however delicate, remains exactly where it is placed, and the effect of the grouping can be studied as the work proceeds. Ferns and other graceful foliage play a great part in this mode of decoration, dividing one flower from another, and entirely concealing the mechanism of the contrivance.

This new system of flower arrangement is specially recommended for the use of ladies, who will be able by its means to produce a great variety of beautiful effects in the whole field of decoration, from Wild Flowers to Orchids. It will also afford great facility to attendants, when ladies are unable to give personal attention.

Prices, securely packed, and packing free :

Carters'

CHOICE "TESTED" GARDEN CABBAGE

(Registered Trade Mark.)

FOR AUTUMN SOWING.

CARTERS' MAMMOTH BEEFHEART CABBAGE.

The best main-crop Garden Cabbage in cultivation; very large firm heads of exquisite flavour, very few outside leaves, and does not readily run. Invaluable both for table and exhibition. Very superior to Enfield Market, Defiance, Emperor, and other varieties.

In sealed packets, per packet, 6d. and 1s.; per ounce, 1s. 6d. post free.

"Carters' Mammoth Beefheart Cabbage is an excellent variety; growing side by side with other sorts it is by far the best."

Mr. F. RUTLAND, Head Gardener to His Grace the Duke of RICHMOND.

"The Head Gardener to His Grace the Duke of Richmond showed me some rows of Carters' Mammoth Beefheart Cabbage, growing side by side with other good sorts, Emperor being one, but they were nowhere with Carters' Beefheart. I tasted some to-day, and they were the finest flavour I have ever come across."—Mr. C. A. HEATHER, Chichester.

CARTERS' HEARTWELL EARLY MARROW CABBAGE.—The best Early Cabbage grown.

We do not hesitate to say that our Strains of the above are the best the world produces.

EARLY SPRING KEEP.

IMPORTANT TO GRAZIERS AND FLOCKMASTERS.

SUBSTITUTES FOR FAILING CLOVER AND GRASS.

If a sowing is made of CARTERS' AUTUMN MIXTURE at the rate of 2½ to 3 Bushels per acre, either upon freshly ploughed land, or well harrowed in upon early cleared corn stubble, a valuable addition to the Spring Food Crop will be secured, or should the Autumn prove favourable, a useful crop for consumption as a change of food may be available before the end of the year.

The Mixture comprises the most Rapid Growing Grasses, Trifoliums, and Clovers, and is suitable for sowing in any district south of a line drawn through the centre of the County of York.

Price 10s. 6d. per Bushel. Carriage Free.

For Districts north of the middle of the County of York we prepare a Special Mixture, comprising the Hardier Varieties of Grasses and Clovers only.

Price 12s. 6d. per Bushel. Carriage Free.

Deficient Clovers or Leys will be greatly benefited by the application of One Bushel of Carters' Autumn Mixture per Acre.

Reasons why every Farmer should grow a few Acres of ITALIAN RYE GRASS.

It will give an earlier and more certain Spring Green Crop than anything else we know of.

In the early Spring it produces magnificent swarths of rich nutritious Green Food during the bitterly cold north-east winds of April and May, and when the growth of other Crops is more or less checked.

Italian Rye Grass is very nutritious, is eaten greedily by all kinds of stock, and, although very succulent, has the advantage of not scouring them. By its use a large number of stock may be kept upon a comparatively limited space of ground.

It is especially suitable for dairying, as securing through about nine months of the year a constant supply of succulent food.

Cows will generally consume about 100 lbs. a day, with more or less corn or cake; fattening beasts require about the same quantity, with rather more corn or cake; sheep will eat from 10 lbs. to 15 lbs. a day.

Italian Rye Grass may be sown until late in Autumn at the rate of 4 bushels per statute acre. If sown early in Autumn it will often give a cut before Winter, whilst as a change of food for early Spring feeding by ewes and lambs it is invaluable.

Italian Rye Grass may also be sown with Trifolium incarnatum (Crimson Clover) at the rate of 2 bushels of the former and 18 to 20 lbs. of the latter per acre.

The ground should be well prepared by the application of as much farmyard manure as the plough will turn under.

Present Price—Per Bushel.
Carters' Superfine Evergreen Italian Rye Grass ... 6s. 6d.
Good Clean Italian Rye Grass... 5s. 6d.

Price per Quarter of 8 Bushels on application.

HOW THE SEED SHOULD BE SOWN.—On corn stubble harrow the land to make a suitable bed for the seed; then sow, and harrow again in a cross direction with the object of covering the seed. Roll well afterwards, as the whole of the seeds delight in a firm bed, and many young plants perish from a want of this tenacity in the condition of the land.

On newly broken up land the same treatment is recommended, even greater importance being attached to the subject of thorough rolling, so as to form a firm, even, and close seed-bed.

As far as possible we use only New Seeds for these Prescriptions.

TRIFOLIUM.

Readers of Carters' "Essay upon Grasses and Grass Lands" will remember we state that Trifolium may be safely sown south of the Yorkshire Wolds.

As a stubble-plant, sown either alone or with Rye Grass, after the corn crop is removed, Trifolium has no equal. It will produce an enormous crop very early in the following Spring, suitable either for consumption as green food or for hay. All kinds of stock eat it freely.

Upon imperfect clover-leys and other crops intended to produce green Spring food, but that may be deficient in plant, the Trifolium is invaluable, by reason of its remarkably rapid Spring growth and abundant productiveness.

The Trifolium was originally introduced from Italy, and for some years it was only known as a cultivated garden-plant, the bright crimson flower being exceedingly pretty.

N.B.—There are also other Varieties of later introduction—i.e., Late Red Trifolium and Late White Trifolium, both of which are useful to sow in smaller proportions to produce successful crops after the first-named has been consumed.

Sow 24 to 36 lbs. per acre (alone), or 18 to 20 lbs. if with Italian Rye Grass Seeds.

Early Red, per lb. Late Red, per lb. Late White, per lb.

Lowest Price on application.

CARTERS' GRASS SEEDS HAVE NEVER BEEN BEATEN IN ANY COMPETITION.

CARTERS' LAWN GRASS MANURE, As used on Carters' "Gold Medal" Lawn at the Paris Exhibition (beating 13 others).

This will give richness of colour and vigour of growth to the Grass, besides enabling it to withstand drought to a remarkable extent.

CAPT. C. YOUNG writes:—"The Manure produced a vigorous growth of Grass, in marked contrast to the surrounding area which was not similarly treated."

Price, in Sealed Boxes, 1/-, 2/-, and 3/-. Per 14 lbs., 4/-; per ½ cwt., 10/6; per cwt., 18/-.

CARTERS' FERTILISING FIBRE.

A New and Valuable Preparation for Covering Grass Seeds.

We have conducted exhaustive experiments at our Trial Grounds with the view of determining the best Covering for newly sown Grass Seeds, resulting in the adoption of a Compost which also contains the necessary Manures, the whole blended in a most convenient form.

DIRECTIONS FOR USE.—After the Grass Seeds have been sown in accordance with the instructions contained in our Lawn Pamphlet, all that is necessary is to carefully cover the Seeds with "CARTERS' FERTILISING FIBRE," watering if dry, no raking in of the Seed being necessary. By the careful use of this preparation, the Seed is covered and manured in the simplest and most effective manner, all risk of damage by a too powerful application of manure being removed.

A Bag of 5 Bushels is sufficient to cover 40 square yards.

Price 8s. per Bag. Greatly Reduced Prices for Large Quantities.

CARTERS' GRASS SEEDS AT LORD'S.

GENTLEMEN,

Lord's Ground has been marvellously improved for many years by the use of Carters' fine Grass Seeds, especially prepared for Cricket Grounds, and I can strongly recommend its use to Secretaries and others interested in the game. We use no other Seeds but Carters'.

Yours, etc.,

PERCY PEARCE, Superintendent.

THE GRASS IN THE LONDON PARKS.

METROPOLITAN BOARD OF WORKS, PARKS, GARDENS, AND OPEN SPACES, NORTHERN DIVISION.

GENTLEMEN,—In reference to the Grass Seeds supplied by you, and sown last Spring in Finsbury Park, Victoria Embankment Gardens, and the various open spaces under the control of the Metropolitan Board of Works on the North side of the Thames, I have much pleasure in bearing testimony to the excellent quality. The percentages in germination of the samples were equal to any others supplied, and taking into consideration the prices, yours were the best value for money. The 50 bushels I had have proved to be fully equal to sample. It has been remarked by many how free we are from foul weeds. My men say it is the best seed we ever had.

December 24th, 1887.

I am, Gentlemen, yours faithfully,
(Signed) THOS. COCHRANE, late Superintendent.

THE IMPROVEMENT AND RENOVATION
OF
Cricket & Tennis Grounds, Garden Lawns,
ETC.,
IN THE AUTUMN.

It is customary to neglect the above after play has ceased in the Autumn, reliance being placed upon early Spring treatment.

This is a serious mistake.

Turf that has become bare or worn by hard wear or other causes should be treated at once in the following manner.

DIRECTIONS.

Fill up holes and level all low places with soil. Make the soil firm by rolling or treading. Then lightly scratch with a rake, sow the seed very thickly (to ensure a close turf), cover with our Fertilising Fibre to the depth of an inch, or with good clean maiden soil to the depth of a quarter of an inch, and water freely, unless the weather is showery. Where our Fertilising Fibre is used, one watering is frequently sufficient, but if soil is used for covering the seed, and there is no rain, watering should be repeated.

Where the grass is thin or worn it is merely necessary to scratch the surface with the rake, sow **Carters' Invicta Lawn Seed** liberally (say 3 to 4 bushels per acre), and scatter a little of our Fertilising Fibre or soil over it to cover the seed.

CARTERS' LAWN MANURE may be applied with advantage over turf where Fertilising Fibre is not used at the rate of 5 cwt. per acre, or a 56 lb. cask to an ordinary Tennis lawn.

A light seeding (say 2 bushels per acre) over the whole turf of a worn lawn will do much towards keeping it in condition; but where the turf is thin the seed should not be stinted. It is far better to do the work well now than to have to go over it again in the spring.

By this practice, during the mild Winter months the grass is making its growth, and a far better result will follow than from any Spring dressing. Bare places sown thickly with seed now will be covered with a closer sward than if replaced with new Turf in the Spring. The ground will be more elastic and altogether better for play.

(For further Particulars as to treatment, see Pamphlet gratis and post free on application.)

For Prices of GRASS SEEDS, FERTILISING FIBRE, and LAWN MANURE, see page 43.

Our Grass Seeds have been used for nearly 20 years at Lord's and the Oval with the most unqualified success.

CARTERS' AIDS TO GARDENING.

CARTERS' FERTILISER. The Best Plant Food.

A highly concentrated manure, specially adapted both to Flowers and Vegetables, comprising those ingredients remarkable for fertilising power. It is prepared by our own agricultural chemist, and we do not hesitate to say that it will be found the cheapest and best fertiliser ever offered.

MISS GALBRAITH, Loughrea, writes:—"I find Carters' Fertiliser or plant food most satisfactory for all sorts of Greenhouse plants, Cinerarias, Geraniums, and Pelargoniums particularly."

MRS. SHOEBRIDGE, of Carshalton, writes:—"I have pleasure in telling you that Carters' Fertiliser answers my purpose very well indeed. I have found it the best I have ever used, and shall recommend it to my friends as the best plant food."

The **REV. McVICAR** writes:—"I have found Carters' Fertiliser most useful and effective, both as a liquid and otherwise. It makes the soil much richer."

MR. P. SAUNDERS, Buxton, writes:—"I must say I never used a better manure than Carters' Fertiliser, both for bloom and foliage."
